

# zazen Alkaline Water System

Create **Alkaline Mineral Water**  
for **just 5 cents per litre!**

BPA-Free  
Plastic  
Bottom  
Tank

Glass  
Bottom  
Tank

**5** YEAR  
PRODUCT  
WARRANTY

- ✓ Ideal for your body's hydration needs
- ✓ Alkaline up to 8.5 pH\*
- ✓ A full range of minerals
- ✓ Tastes great!
- ✓ Exceptional value
- ✓ BPA free
- ✓ Reduces fluoride

\*if your originating water source pH is below 7.4 (ideal) or if you wish to boost the alkalinity/pH of your water; you can add the zazen Alkalinity & Anti-Oxidant Enhancer (AAE) product to your zazen Water System.

# Water Quality - zazen Sub-Micro Filtration

Water Test Results	
Alkalinity pH	Up to 8.5
Chlorine Reduction	99.98%
Fluoride Reduction ppm	Up to 90%
Total Organic Carbon Reduction mg/l	>99.5%
THM's & Chloroforms Reduction ug/l	>95%
Cyst Reduction (Cryptosporidium & Giardia)	>99.99%
Algae, Rust, Sediment & Suspended Solids Reduction	>99.98%
Harmful Bacteria Reduction (E.coli, Salmonella, Klebsiella)	>99.99%
Filtration at 0.5 microns	99.9%
Filtration down to 0.2 microns	98%
Copper, Cadmium, Lead, Mercury & Arsenic Reduction mg/l	99.98%
Aluminium Reduction mg/l	99.98%
Flow Rate Gravity	3 litres / hour
TDS (Total Dissolved Salts) ppm	370

## zazen Alkaline Water – emulates Mother Nature's water cycle

✓ **pH - Alkalinity** up to 8.5 pH. pH is influenced by the originating water source – adding **zazen Alkalinity & Anti-Oxidant Enhancer (AAE)** will increase pH up to 2 points through the natural release of additional alkaline ionised minerals.

- ✓ Tests independently conducted by SAS Laboratories – a Certified Government Water Testing Laboratory.
- ✓ Replacement of parts (filters and stones) as detailed in zazen Care Instructions is critical to continued quality filtration.
- ✓ Fluoride reduction % is based on the dose rate of 1.0 ppm. Reduction can vary and is dependent upon your local water supply.
- ✓ TDS can also vary dependent upon your local water supply.

# zazen Alkaline Water System

## State-of-the-Art 10 Stage Process

### STAGE 1

#### Ceramic Filter

0.2 Micron Pre-filtration

Replace every 12 months

### STAGES 2-7

6 Stage Filter Cartridge

Replace every 4-6 months

### STAGE 1 - Ceramic Filter

- Constructed of highly compressed and fired Diatomite earth with a pore size 0.2-0.5 micron.
- Prefilters; rust, sediments and organic matter.
- Stops bacteria, cysts, parasites and hazardous micro-organisms.

### STAGE 2 - Silver Activated Carbon

- High quality silver activated carbon inhibits bacteria growth in filter.
- Reduces chlorine, herbicides & pesticides, industrial poisons & MTBE's, Trihalomethanes (THM's), organic chemicals, odours and particulates.
- A purifying surface area of over 68 acres!

### STAGE 3 - Fluoride Reduction

- Designed for the effective filtration and reduction of fluoride and arsenic.

### STAGE 4 - Activated Zeolite

- Inhibits bacteria and traps heavy metals such as lead, aluminium, nickel, cadmium and mercury.
- Removes detergents, ammonium, agricultural chemicals and other toxins.

### STAGE 5, 6 & 7 -

### Bio-Ceramic Pi & FIR Energy Balls + Silica Sand

- Constructed from highly compressed diatomaceous earth and mineral oxides.
- Emits beneficial Far-infrared to energise the water and Pi energy to enhance bioavailability.
- Provides additional filtration to balance pH and neutralises acidic components in tap water.
- "Polishes" the water for brilliant clarity and sparkle.
- Infuses natural silica – renowned for strengthening collagen for radiant hair and nails.

STAGES 8 – 10  
continue over page

### System Capacity

Upper Tank holds 4 litres

Lower Tank holds 8 litres

### Warranty & Care

90 day Money Back Guarantee

5 Year Product Warranty

Free Customer Reminder Service

### System Dimensions

Base: 315mm diameter

Height with BPA-Free Plastic

Bottom Tank: 560mm

Height with Glass Bottom Tank: 530mm

# State-of-the-Art 10 Stage Process continued

**STAGE 8**  
Mineral Stones  
Replace after 5 years

## STAGE 8 - Natural Mineral Stones (1kg box)

- Contains calcium, iron, magnesium, potassium, silicon and other trace minerals \*WHO – the World Health Organisation recommends drinking water containing all these minerals.
- Helps balance, fortify and assist with pH and increases the amount of dissolved oxygen in the water.
- zazen Mineral Stones are mined from pristine deposits 300 + metres below the earth's surface without damage to the environment.

**STAGE 9**  
Silver Stones  
Replace every 12 months

## STAGE 9 - Silver Stones Antibacterial Protection (500g box)

- Silver is a natural anti-bacterial agent which by design keeps the lower tank clean and maintenance free.
- The zazen Silver Stones naturally preserve the freshness of the water in the zazen tank through this anti-bacterial effect – ensuring the best quality water is ready to drink all day, every day.

Water that is stagnant loses much of its life sustaining properties; the mineral stones combined with the silver stones in the bottom tank ensure the water is kept in a balanced healthy state.

**STAGE 10**  
Magnetic Tap

## STAGE 10 - Magnetic Energy 1200 Gauss Tap

- In this final stage we surround the water with magnetic energy – just as spring water is exposed to the earth's magnetic energy.
- Restructures - magnetising water creates a free flowing hexagonal structure and also breaks down the size of water clusters for faster, immediate cellular hydration.
- As the water tumbles through the magnetic tap oxygen is increased (a natural anti-oxidant).

Alkalinity & Anti-Oxidant  
Enhancer (AAE)

## Optional Extra - Alkalinity & Anti-Oxidant Enhancer

(AAE) 100g pack

Further increases the pH, alkalinity, essential minerals and antioxidants in your water.

- Releases additional ionised magnesium & calcium minerals, increasing the alkalinity and pH of your water.
- Increases antioxidants by further lowering your water's ORP aiding in neutralising free radicals.
- Increases FIR (vibrational energy) said to assist blood purification, promote growth and inhibit harmful metal ions.

# How Much Does It Cost?

**Compare & Save** - Buying bottled water? How much do you spend per week?

Only  
**5c**  
per litre

If you spend...	\$15 per week	\$30 per week
Bottle Water cost - per year	\$780	\$1,560
Bottle Water cost - 3 years	\$2,340	\$4,680
zazen Water cost - 3 years	\$1,037	\$1,037
zazen Water System Savings	\$1,303	\$3,643

\*The zazen Water 3-year costs include the BPA-Free System, and all the filter & stone replacements.

**"Not only do we love the taste and how it makes us feel,  
we are saving over \$1000 per year  
switching from bottled water!"**

John, Geologist, NSW.

The annual replacement costs for zazen Water Filters & Stones are the same as the annual cost to maintain a Brita Jug!

## System Replacement Parts

zazen Multi-Stage Filter Cartridge	Replace every 6-months
zazen Ceramic Filter	Replace every 12-months
zazen Silver Stones	Replace every 12-months
zazen Alkalinity Enhancers	Replace every 12-months
zazen Mineral Stones	Replace every 5-years
Total investment over 5 years (Using 12 litres a day)	5 cents per litre

**Replacement  
Parts**

**zazen Alkaline  
Water System**

## zazen System Measurements

Top Tank Capacity (BPA-Free Plastic)	4 Litre
Bottom Tank Capacity (BPA-Free Plastic or Hand-Blown Glass)	8 Litre
System Width	315mm diameter
System height with BPA-Free Plastic Bottom Tank	560mm
System height with Glass Bottom Tank	530mm
